

Science Summer Reading Assignments for 2016

Science Research

10th Grade Students Entering the Program

Read 5 General Articles on a topic or topics that Interest you. This means short articles from popular magazines and newspapers, such as Popular Science and/or The New York Times.

Assignment: For each article write up a list of vocabulary words from the article, a list of questions you have for the author and a brief (1 paragraph) summary of the article. Bring the articles and the printed write ups to your first day of class for discussion.

IB Physics

Assignment 1: The Solar System

Assignment 2: The Big Bang

Assignment 3: Flatland

The specifics of the assignments are posted in Google Classroom. All students were given the class code to join the class from Mr. Hotaling and their Chemistry teachers. They can email Mr. Hotaling if they need the access code at hotalingl@dfsd.org.
